

Joshua E. Fulmer

Electric Boat Management Association

2021 Candidate for Board of Directors

EB, even better, with EBMA

Joshua Fulmer
Design Supervisor -
WPDD Supervisor
D459 – Structural Design
Joined Electric Boat - March 2013

Joshua joined Electric Boat in March of 2013 with 10 years of naval submarine experience. Born and bred in South Carolina, Joshua left for the United States Navy working on board as a Machinist's Mate having operated habitability systems, the onboard Diesel Engine, hydraulic systems, and Quality Assurance. He was hired into Electric Boat into Department 424, Audit and Assessment, and was soon accepted into the Green Belt program that Electric Boat offered. After his Green Belt project, he was hired as a Black Belt for D400 to support Structural Design and Engineering and worked closely with the WPDD organization within D459 Structural Design. He was hired in March of 2020 as a Design Supervisor and has become recently the Supervisor for WPDD.

During his time working at Electric Boat, Josh recognized the need to volunteer his time more and the opportunity arose within the EBMA as Vice President. During his tenure, he has assisted getting the EBMA website transitioned to support online PayPal sales, a first for the organization, and supported the 2020 EBMA Dependent Scholarship.

If provided the opportunity, Josh is willing to work with the board to steer the EBMA toward future offerings to ensure sustainability for the organization and provide guidance from his past experiences. The need to provide services during the pandemic is challenging and he is willing to tackle those challenges to build confidence with the EBMA members for development during this perplexing period.
