

Joshua Gillenwater  
Program Representative, Senior – ILS Coordinator  
Dept. 411 – Planning Yard and Life Cycle Programs  
Years at Electric Boat – 2 years

Joshua joined Electric Boat in April of 2019 as part of the planning yard. Prior to joining the team, he spent nearly ten years as a navy submarine electrician and radiological controls technician, serving on the USS PITTSBURGH (SSN 720) and USS FRANK CABLE (AS-40). He took a small hiatus from the navy and worked as a data center technician for five years with Google. Following his time at Google, he resumed his work with the navy by joining a team at NUWC Newport, before finally making his way to Electric Boat.

At Electric Boat, Joshua serves as an Integrated Logistics Support (ILS) coordinator. He coordinates and communicates with each ILS partner group to update ILS products so VIRGINIA and OHIO class submarines are properly supported following engineering and design changes. He also provides ILS process guidance to new team members and colleagues unfamiliar with ILS. As a life-long learner, Joshua has a Bachelors degree in Psychology, a Masters degree in Kinesiology, and is wrapping up an MBA from Syracuse University. Professional and personal development has been a passion for him throughout his career, and he spends a lot of time on training and mentoring others.

Joshua spends most of his time outside of work doing activities with his very extraverted daughter and family. Prior to going back to school he volunteered time at the Pequot Nature Center, and hopes to resume his community involvement once his program is finished.
