# GENERAL DYNAMICS

### Topic: Electric Boat - Critical to our National Defense yesterday, today, and for the foreseeable future!

Admiral (retired) Cecil Haney plans to illustrate how the submarines built by Electric Boat are critically important to US national security to support deterrence and if deterrence fails to provide the necessary combat power to bear now and for the foreseeable future. He also plans to discuss the overall importance of the success of the industrial base that builds and maintains these incredible platforms.

Admiral Haney retired in January 2017 after completing 38 years of distinguished service in the United States Navy. As a 4-star Admiral, he commanded the US Strategic Command (2013-2016) responsible for strategic capabilities involving nuclear weapons, missile defense, space and cyberspace and the US Pacific Fleet (2012-2013) responsible for the manning, operations and maintenance of the US Navy fleet located in the Pacific and Indian oceans.

He now serves on the Johns Hopkins University Applied Physics Board of Managers, the Naval Studies Board, the Aerospace Corporation Board of Trustees, and the Board of Directors for General Dynamics Corporation, Tenet Healthcare Corporation, Systems Planning and Analysis Inc., and the Center for a New American Security. He also serves on the Penn State University Applied Research Lab Advisory Board and as the Chairman of the Board of Directors for the Military Child Education Coalition and Chairman of the Board of Trustees for Hillandale Baptist Church.

During his military career, he had the opportunity to lead large organizations, develop and execute strategic and operational plans, manage substantial budgets, interface with political and international leaders, and facilitate teamwork and training, while collaborating across government, commercial, and international entities; academic; and research and development organizations. As a career submariner, he had command of the fast attack nuclear submarine USS Honolulu (SSN-718), Submarine Squadron ONE (Pearl Harbor, HI), and Submarine Group TWO (Groton CT). He has also served on the Chief of Naval Operations staff as the Director of Submarine Warfare and the Director of Naval Warfare Integration Group.

Born and raised in Washington, DC, Admiral Haney completed graduate education at the National War College in National Security Studies and the Naval Post-Graduate School in Engineering Acoustics and in Systems Technology. He graduated from the United States Naval Academy with a degree in Ocean Engineering.

Member \$30

Guest \$35
